

About Us

ComNet is a manufacturer of Fiber Optic communication products. Located in **Danbury, Connecticut, USA** and with offices in the **United Kingdom**, ComNet focuses on providing innovative communications networking solutions to the **Security Market** and **Intelligent Transportation System Markets**. The product line consist of **fiber optic video, data and audio transmission products** as well as a **broad Ethernet product line**, designed to the specific requirements for the security market with applications including **Controlled Access, Intrusion, Burglar and Fire Alarms and CCTV Surveillance systems** as well as ITS applications such as: **Closed-loop traffic signalization and video detection systems, roadside CCTV surveillance, electronic toll collection, and variable message signs.**

George Lichtblau, the founder of the former **International Fiber Systems**, formed ComNet in 2007. The ComNet team developed a completely new and updated line of fiber optic and hardened Ethernet products. ComNet officially announced our intention to market in June 2008. ComNet returns to the **business ethics, customer support, engineering and quality** that were characteristic of IFS prior to being sold to GE in 2003.

ComNet is comprised of many of the most talented former IFS and Fiber Options employees. That talent allows ComNet to perform at a higher level. **Every engineer** at ComNet has **over 10 years experience** designing complex fiber optic and electronic circuits. Our technical support and sales personnel have **over 10 years experience** working with complex networks, using both fiber optic and IP compatible transmission equipment.

The product line presented here is the result of that talent and experience and is far advanced from what is currently available. **That's why ComNet backs all our products with a lifetime warranty.**

Notable Projects

US Customs & Border Protection – Sierra Vista, AZ and Calais, ME
US Capitol – Washington D.C.
